EDUCATION

Bachelor of Computer Science | University of Tennessee, Knoxville | Graduated 5/2025

- 3.99 GPA, Summa Cum Laude, UTK eSports club (co-captain), and Lunabotics (controls team member)

Seymour High School | Graduated 5/2021 | 4.56 GPA, Valedictorian, 35 ACT, 1470 SAT

EXPERIENCE

Electrical Research and Development Intern | Siemens Healthineers | 1/2024 – 8/2024

- GUI development in Python using PySide6 and C# with WPF
- Arduino distributed system for sensor data acquisition (hardware, wiring, soldering, and software)
- CUDA/C++ research project to help scale processing speeds with data inflow
- C RESTful API development on Zephyr RTOS along with React, Tailwind, and Typescript frontend

Teacher's Assistant | University of Tennessee, Knoxville | 8/2022 – 12/2023

- Responsible for hosting office hours, liaison between students and professors, proctoring exams, grading, and labs
- TA for COSC101 (intro), COSC202 (DSA I) and COSC302 (DSA II)

SKILLS AND AWARDS

- C/C++ and C#
- Python, bash, and batch scripting
- JTAG, ADC/DAC, UART, oscilloscope
- AWS Lambda, SNS, SQS, VPC, RDS
- Computer networking and security
- Java and Kotlin
- TypeScript, CSS, React
- Golang
- PostgreSQL
- Rust

PROJECTS

OpenTicket (Group Project) | 5/2025 | Golang, React Typescript), SQL, AWS CDK, Solidity

- Go backend that interfaces with Postgres Amazon RDS on a VPC using Lambda functions
- Solidity contract to handle ticketing and tracking
- React frontend using typescript with dynamic.xyz authentication provider and Coinbase API helpers for conversion

Rdiff (Personal Project) | 4/2025 | Rust

- Rust terminal user interface to show the differences between two files with syntax highlighting

Digital Dash (Personal Project) | 12/2024 | Golang and Kotlin

- Go backend that runs on a Raspberry Pi and serves up car sensor data across Bluetooth from the OBD-II port
- Android native app to receive and show data written in Kotlin
